The works of Italian artist and poet Domenico Mimmo Rotella will be exhibited under the theme 'The Maverick Mimmo Rotella' at The Robilant+Voena gallery in Milan from September 20, through October 28, 2016. The event is being organized within the exhibition 'Mimmo Rotella 2016' to commemorate the 10th death anniversary of the artist.

The exhibition will feature lesser known accounts of Rotella's artistic techniques adopted and used during the span of his career which began in the 50s and ended in the early twenty-first century. Renowned for his *décollages*, Rotella's need to develop different techniques was born out of the need to overcome the limitations imposed by the tradition of the expressive mode already encoded. Objects found in daily life became his inspiration - mainly posters pasted on the walls, photographs, newspapers, the printing sheets became for him the source of analysis and insight from which to derive directions.
